MOBILE

MOBILE TECHNOLOGIES

Advanced mobile system for law enforcement officers.

Eagle*Mobile software gives your officers access to critical information while they are on patrol. The mapping function continuously shows the location of all mobile units, as well as their bearing and speed. Officers can securely search state, local, and NCIC criminal databases for invaluable information such as missing persons reports, warrants, stolen property, and firearms. The software returns both audible and visual responses, so officers can focus on the situation and ensure safety.

Eagle*Mobile Features

• Eagle*Advantage RMS / JMS Search

• Federal & State Queries

• GPS Mapping / Positioning

• Traffic Stop & E-Ticket

• On-Site Incident Reports

• Group Messaging

• Individual Instant Messaging
