

RMS

RECORDS MANAGEMENT SYSTEM

SMARTER DATA, SAFER COMMUNITIES.

• SECURE & RELIABLE INFORMATION FLOW

Eagle*Advantage RMS ensures secure data management by providing multiple levels of user security and audit trails to protect against unauthorized access.

• COMPLIANCE & REPORTING

Upon accurate entry, captures and organizes data to meet state and federal reporting requirements, ensuring your agency stays compliant with regulations while maintaining reliable records.

• NIBRS STEP-THRU VALIDATION

Easily validate NIBRS incident reports with a step-thru process that detects missing mandatory data or invalid entries upon saving a record. Proper validation prepares records for NIBRS data uploads.

• AVAILABLE INTERFACES

Avoid dual entry on different platforms using one or more of our multiple interfaces available for uploading tickets to courts, accident reports to the State, and many more. Request a quote for a custom interface.
